# Smart Investing Workshop Audience FEEDBACK

- “Very thorough & intriguing analysis of the world economy.”
  - “Very experienced speaker. A learned speaker.”
  - “Excellent. Very good, well researched and explained.”
  - “An interesting and integrated outlook.”
- 
- “This talk has opened my eyes to the relevance of a variety of subject domains eg. statistical forecasting, political science and economics, and even marketing psychology, towards wise investing in the stock market and mortgage/housing markets. The rather artistic models of the stock market and the economy (soup theory, tank theory, etc) provide rich inspiration towards perceiving the economy, the financial tools and instruments, and the concept of this money; certainly makes all these arcane ideas more accessible to the layperson.”
  - “Market Sentiment survey is an innovative method to judge the optimism of the market.”
  - “A pleasant confluence of academic education, knowledge sharing and human inspiration.”
  - “Your mentoring sessions are insightful and filled with many useful information.”
